

OMNI-CHANNEL RETAIL SOFTWARE

ETP MOBILE SHOP-IN-SHOP SOLUTION

www.etpgroup.com

Innovative solutions with solid foundations

ETP's Mobile SIS (Shop-in-Shop) solution helps you better manage your sales, CRM and inventory on a convenient mobile platform in your SIS/Consignment location within department stores.

Your store's staff is now empowered with the technology to better manage your customer experience.

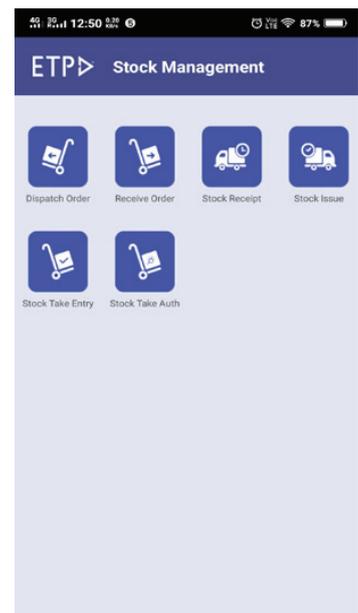

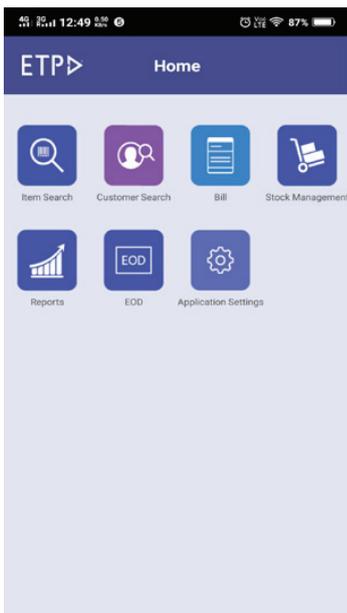

You can now make your replenishment more efficient to avoid over and under stock situations with online information of sales of SIS stores.

You can receive goods and track inventory movement with your goods receiving and stock take functionality at SIS stores.

It eases the reconciliation with department stores on periodic sales and collection.

You can host the solution on premise or on the cloud.

Built on the technology that supports both Android and iOS, the ETP Mobile SIS solution integrates with the highly scalable and proven ETP EAS central server and seamlessly synchronizes with ETP's POS, Promotions, Supply Chain and Analytics solutions.

ETP Mobile SIS (Shop-in-Shop)

Benefits of ETP Mobile SIS Solution

Endless Aisle – better customer service

ETP SIS helps in providing better customer service in case a particular SKU, which the customer is looking for, is not available in the current SIS store. In such situations the store associate can use Endless Aisle item stock search to check stock available in nearby SIS or other stores.

Real-time tracking of SIS sales

ETP SIS is designed in such a way that all SIS transactions are directly updated to the central server enabling real time tracking of SIS sales. In case of large SIS stores, multiple users can update the sales using the ETP SIS mobile application. Users can access the sales and stock reports in the SIS application for tracking the sales.

Help in better replenishment planning

ETP SIS helps retailers to get real time inventory status of the products' stock at the SIS stores, eliminating the limitation of depending solely on department store's information to procure SIS sales and stock

data, which typically happens once a week. This helps in better replenishment planning of the SIS stores and avoiding any loss of sales.

Helps in reconciliation of SIS sales with department store sales data

ETP SIS provides the ability to update the department store invoice reference in the bill and also allows to edit the price to match with current promotions, if any. This helps in reconciliation of sales data collected from the department store. The EOD function helps in managing transactions as per the business day for store associates.

Customer management

ETP SIS allows to create customer along with de-duplication, and sales can be updated for a customer, enabling access to overall buying history of the customer from the SIS or owned stores.

Stock transaction and inventory management at SIS stores

ETP SIS helps in handling all inward and outward stock

transactions for the SIS store in order to manage the receipts from the warehouse or sending stock back to the warehouse. All transaction documents can be viewed in a PDF format which can be emailed or printed locally. ETP SIS also helps in handling stock take for the SIS store.

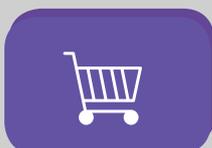

ETP SIS enables a single user to access multiple SIS stores. This feature is useful to the central audit team for stock take approval and accessing the stock transactions at the SIS store.

ETP Supply Chain – SIS transaction

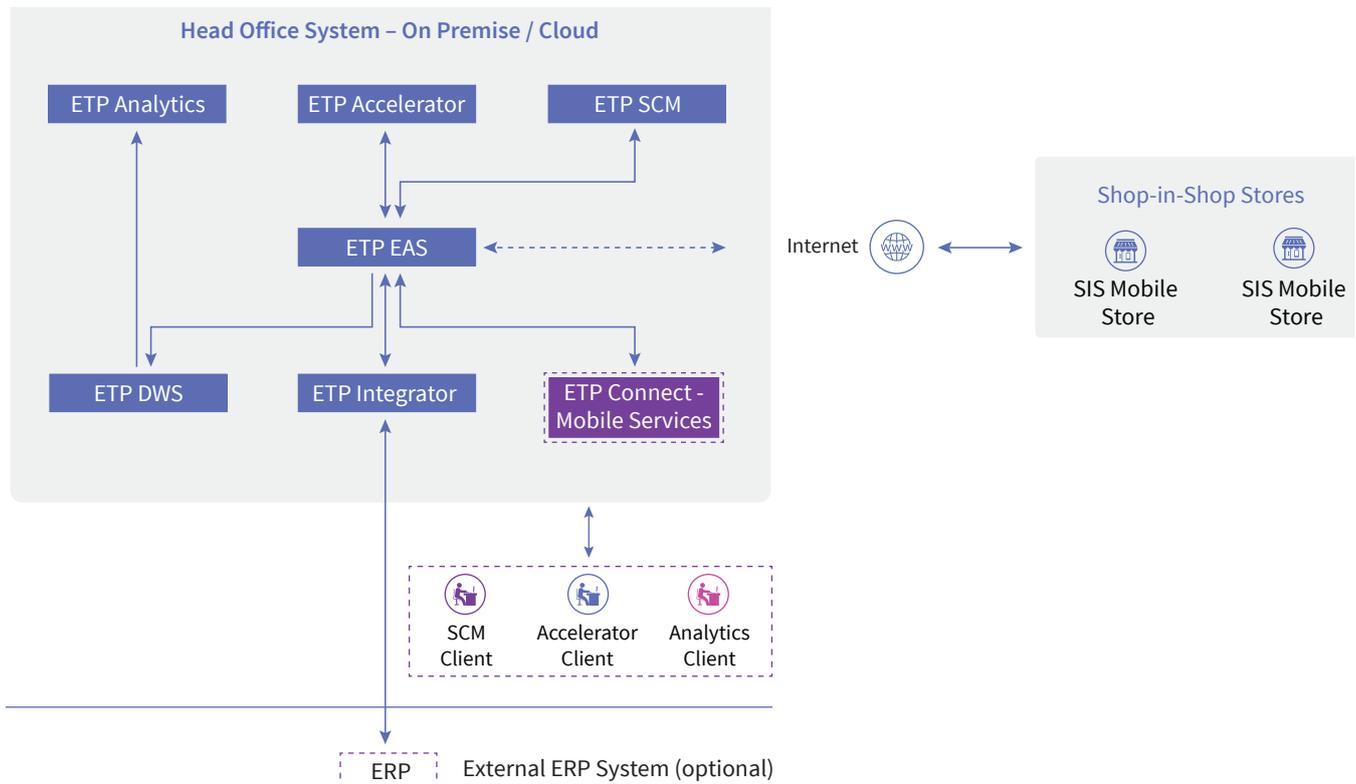

Stock transactions from the warehouse to the SIS stores can be done in ETP Supply chain.

ETP Analytics – SIS performance analysis

SIS stores can be attached to a specific location hierarchy to show SIS sales separately. Various sales KPI analysis such as best performing stores, category wise analysis, top selling items, sell through, stock cover, and so on, will be available for monitoring SIS sales.

SIS Mobile Solution Architecture

SIS Mobile Solution Architecture

ETP's 30 years in retail has resulted in building a robust domain knowledge base, demonstrable through its renowned best practices templates. The ETP V5 Omni-channel Retail Software Solution has the unique flexibility to be implemented comprehensively or modularly, in premise or on the cloud,

on virtually all platforms. It is seamlessly integrated through POS, CRM, social media and e-commerce, merchandise planning, promotions planning, procurement, distribution, warehousing and analytics (BI). With the scalability to support a global chain of stores, the solution is stable and sustainable, supporting

business operations and processes when the enterprise scales up. Its open platform model allows retailers to select the technology platform best-suited for their business. It can be integrated to legacy or existing applications which maximizes past investments and minimizes the need for write-offs.

As the retail industry continues to evolve dynamically, ETP V5 is equipped to support retail enterprises with operations spanning geographical distances, cultural diversity, demographic disparities and varied government regulations.

Every year, 70,000 retail associates use ETP to serve 200,000,000 consumers, selling USD 18,000,000,000 of merchandise. More than 300 brands in over 22 countries, across 10 time-zones, in 200+ cities, at 35,000+ stores, run on ETP.

Asia's Leading Omni- channel Retail Software

Founded in 1988, ETP is Asia's leading Omni-channel Retail Solutions company headquartered in Singapore, serving market leaders in more than 22 countries across Asia Pacific, India and the Middle East. ETP's enterprise class, omni-channel solutions include omni-channel POS, Mobility, CRM, Marketing and Promotion Campaigns, Supply Chain Management, Omni-channel Analytics and Omni-channel Connect. ETP has successfully executed over 500 enterprise software projects across 35,000+ stores for 300+ brands. ETP's unique value proposition is its ability to create and deliver innovative products and implement them successfully with domain expertise delivered by hundreds of consultants embodying ETP's best practices. ETP helps its customers get it right in omni-channel retail.
